

REMARKS

Formal Matters

Claims 1 and 3-13 constitute all currently pending claims in the application. The Examiner incorrectly indicates that canceled claim 2 is pending and rejected on the Form PTOL-326. Applicant respectfully requests a corrected indication of claim status in the next PTO communication.

The Examiner does not indicate that the drawings filed with the application on August 18, 2004 have been accepted. Applicant respectfully requests an indication of acceptance of the drawings in the next PTO communication.

Claim Rejections Under 35 U.S.C. § 103

Claims 1 and 3-13 stand rejected under 35 U.S.C. § 103(a) as allegedly being unpatentable over U.S. Patent No. 6,637,853 to Ahne et al. (“Ahne”) in view of U.S. Patent No. 6,082,911 to Murakami (“Murakami”). Applicant traverses this rejection for at least the following reasons.

Independent claims 1 and 8-12 are amended to require that the print head is returned to the reference position after printing the first reference pattern, and that the print head is moved from the reference position to a position for printing a second reference pattern. Ahne fails to teach or suggest these elements of amended claims 1 and 8-12.

Moreover, Murakami does not appear to make up for these deficiencies of Ahne, as Murakami is cited merely for its alleged teaching of (1) printing a reference pattern while a set amount is changed; (2) correcting a print start position of the print head with a correction amount determined according to a relationship between the first and second reference patterns; and (3)

correcting a print start position in accordance with a set amount of a line segment closest to the other reference pattern.

Thus, Ahne and Murakami, alone or in combination, do not appear to teach or suggest each and every element of claims 1 and 8-12. The cited references, therefore, fail to render claims 1 and 8-12 unpatentable. Accordingly, Applicant respectfully requests that the Examiner withdraw the rejection of independent claims 1 and 8-12, and their dependent claims 3-7 and 13.
